

✦ Agentic Finance

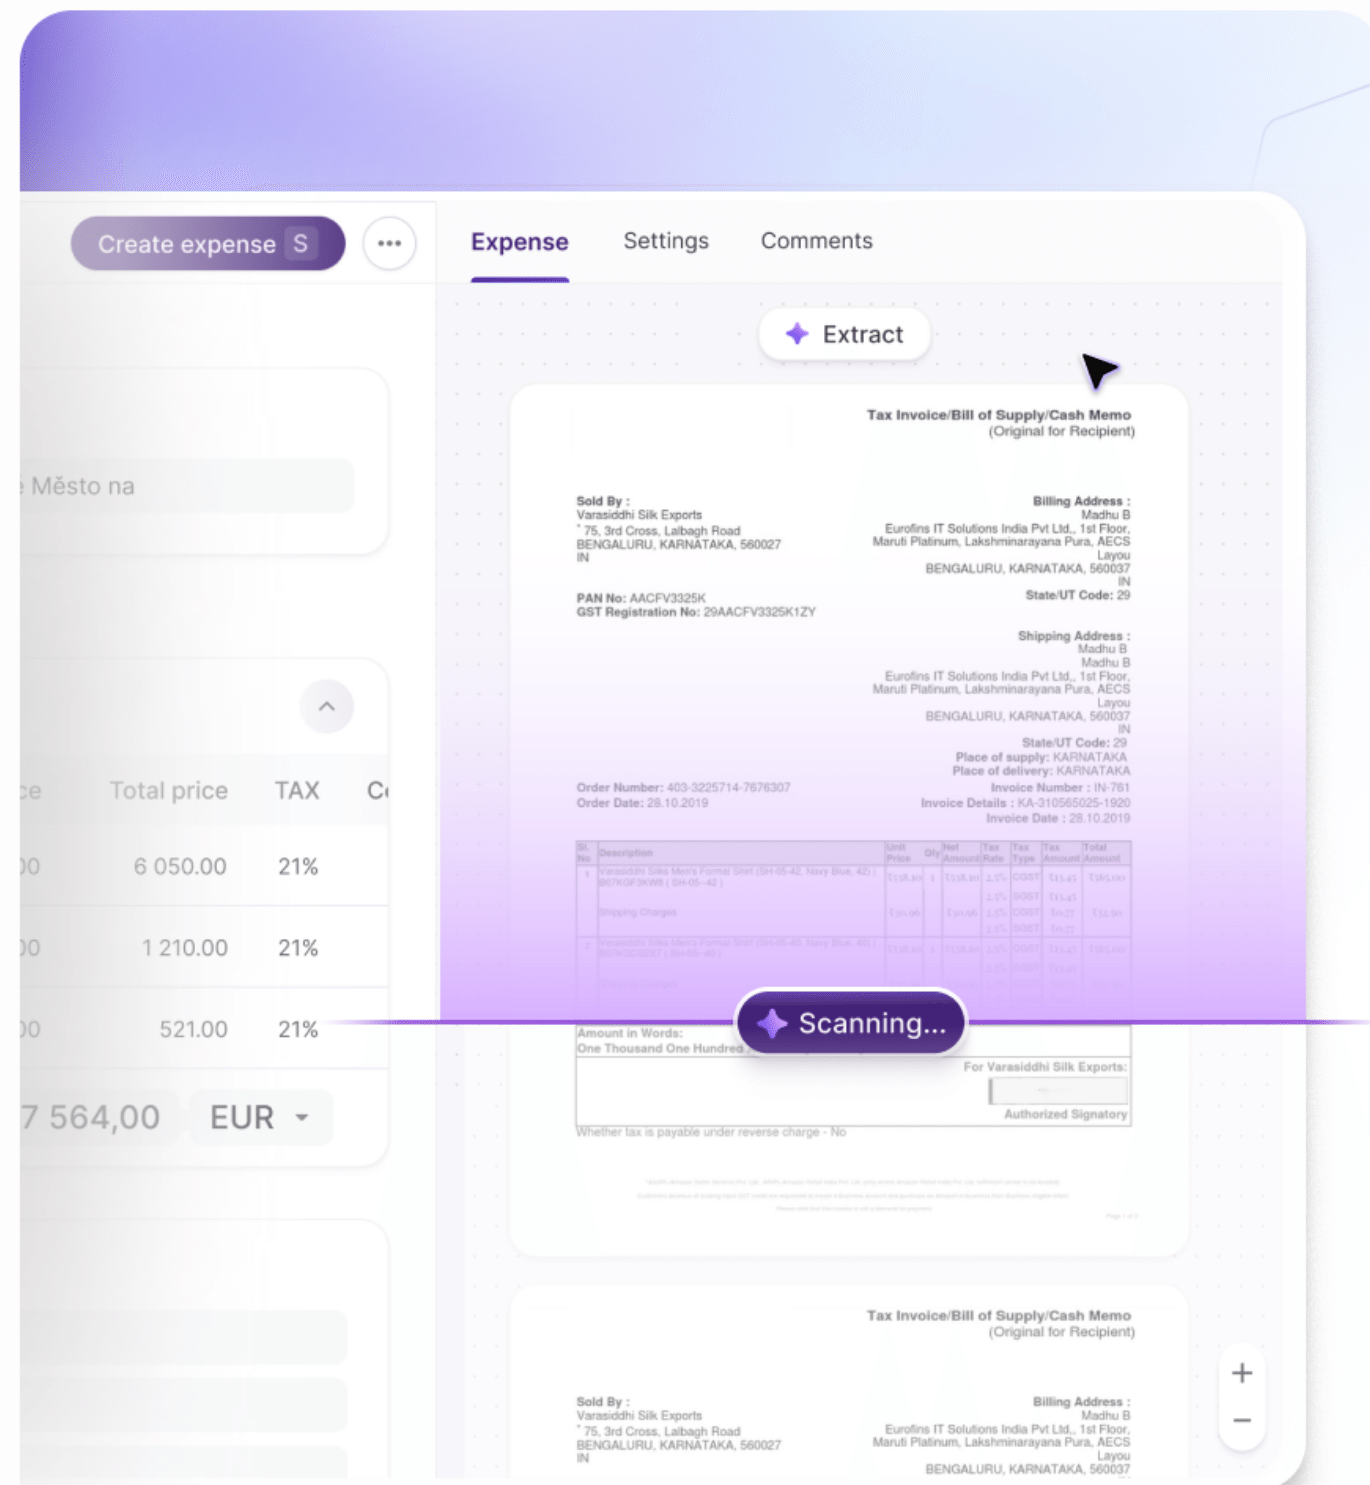

Your quiet partner in the background.

Your Financial Companion.

Lucanto's AI isn't a chatbot. It's your financial agent silently observing your operations, anticipating what needs to be done, and taking care of it before you ask.

It uploads the invoice that just arrived. Categorizes your expenses. Prepares your tax summary. And when something looks off — it tells you.

The future of finance isn't manual.
It's **agentic**.

The problem SMBs face every day

Every business owner in Europe juggles **the same pain**

Scattered invoices in email threads

Important payments buried in inboxes chaos and lost across message chains.

Lost receipts & expenses

Paper trails vanish before they ever reach the books.

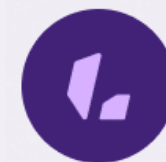

Endless accountant back-and-forth

Every question turns into another round of files, emails, and clarifications.

No visibility into business performance & taxes

Without a single source of truth, decisions are made in the dark.

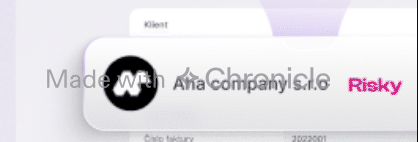

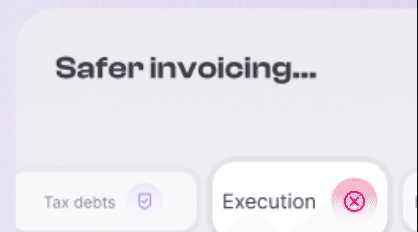

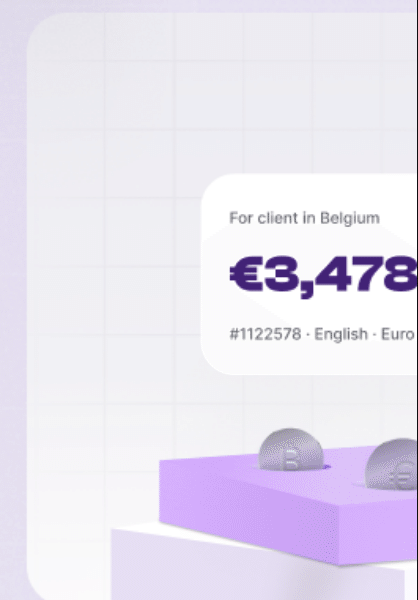

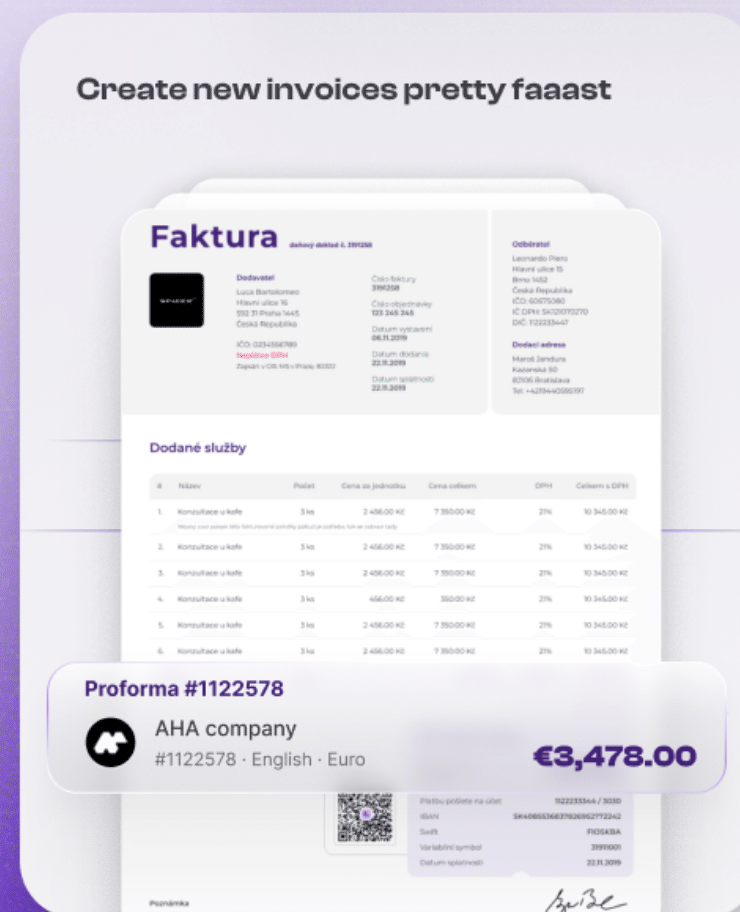

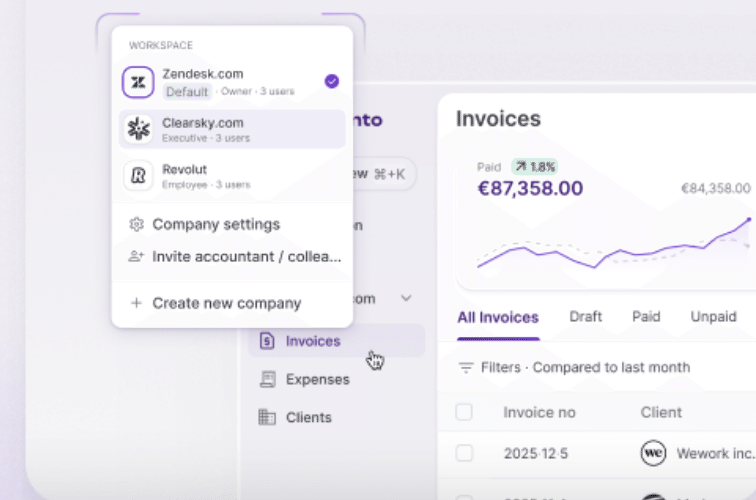

How we are different?

Connects revenue, expenses, taxes, and collaboration **into one intelligent flow.**

- Generate invoices in seconds – multi-language, multi currency
- Automatically extract data from receipts and PDFs
- Collaborate with accountants in real time
- View cashflow and tax estimates instantly
- File taxes with one click (starting in Slovakia)

What is Lucanto?

New kind of financial workspace

Lucanto is where invoices, expenses, taxes, and collaboration finally come — **together.**

A single workspace where founders and accountants work in sync — and where AI quietly does the heavy lifting.

A Accountant

Made with Chronicle

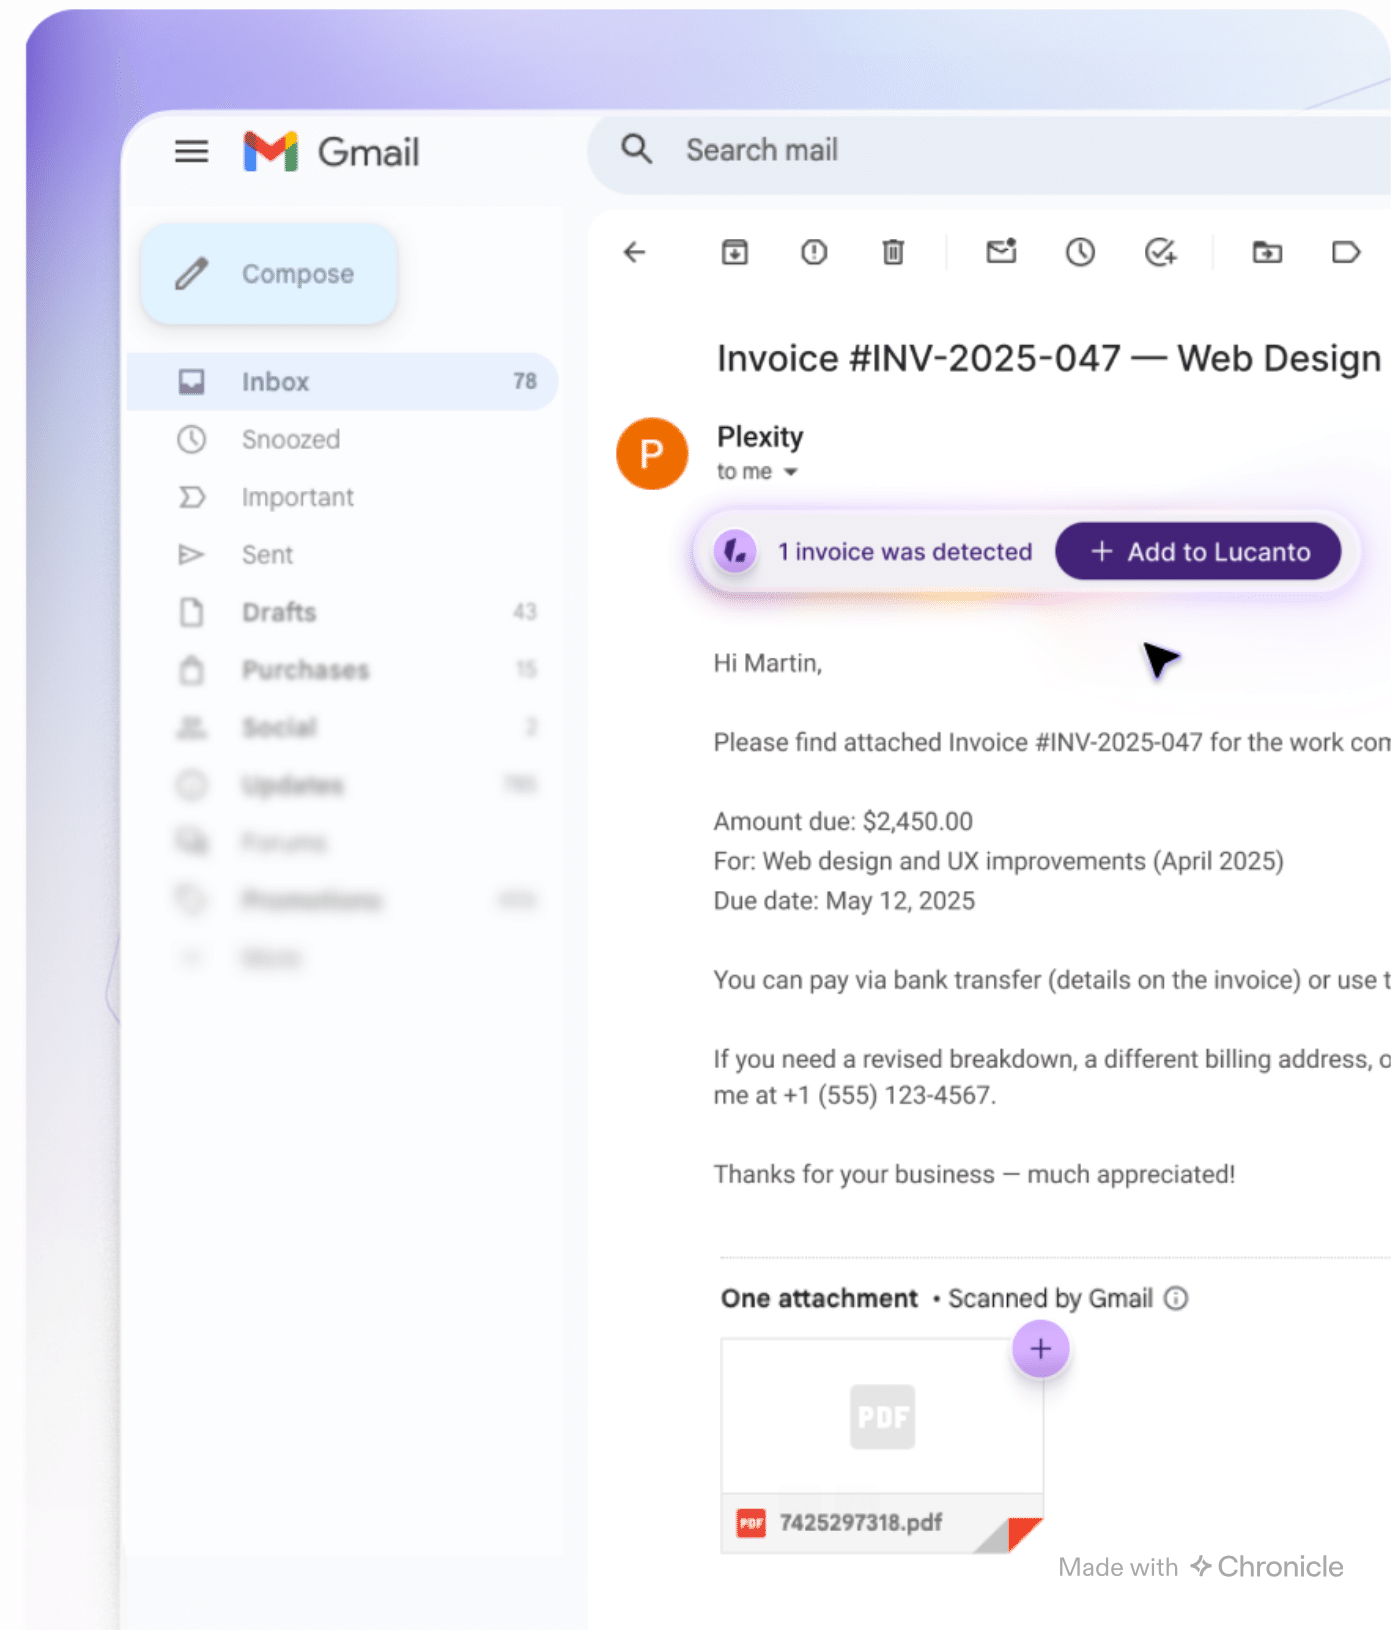

How we are different?

Invoices **won't** **hide** in your inbox anymore

They arrive quietly. Lost between newsletters, receipts, and noise. Each one waiting to be found, downloaded, uploaded again.

Lucanto ends that. It sees your invoices where they live — in your inbox — and with one click, turns chaos into clarity. No hunting. No forwarding. No forgetting.

How we are different?

Collaboration at the Core

No more file attachments or endless email loops.
Just one thread — one truth. Lucanto is a shared
workspace where you can:

Chat in context of any
invoice or expense

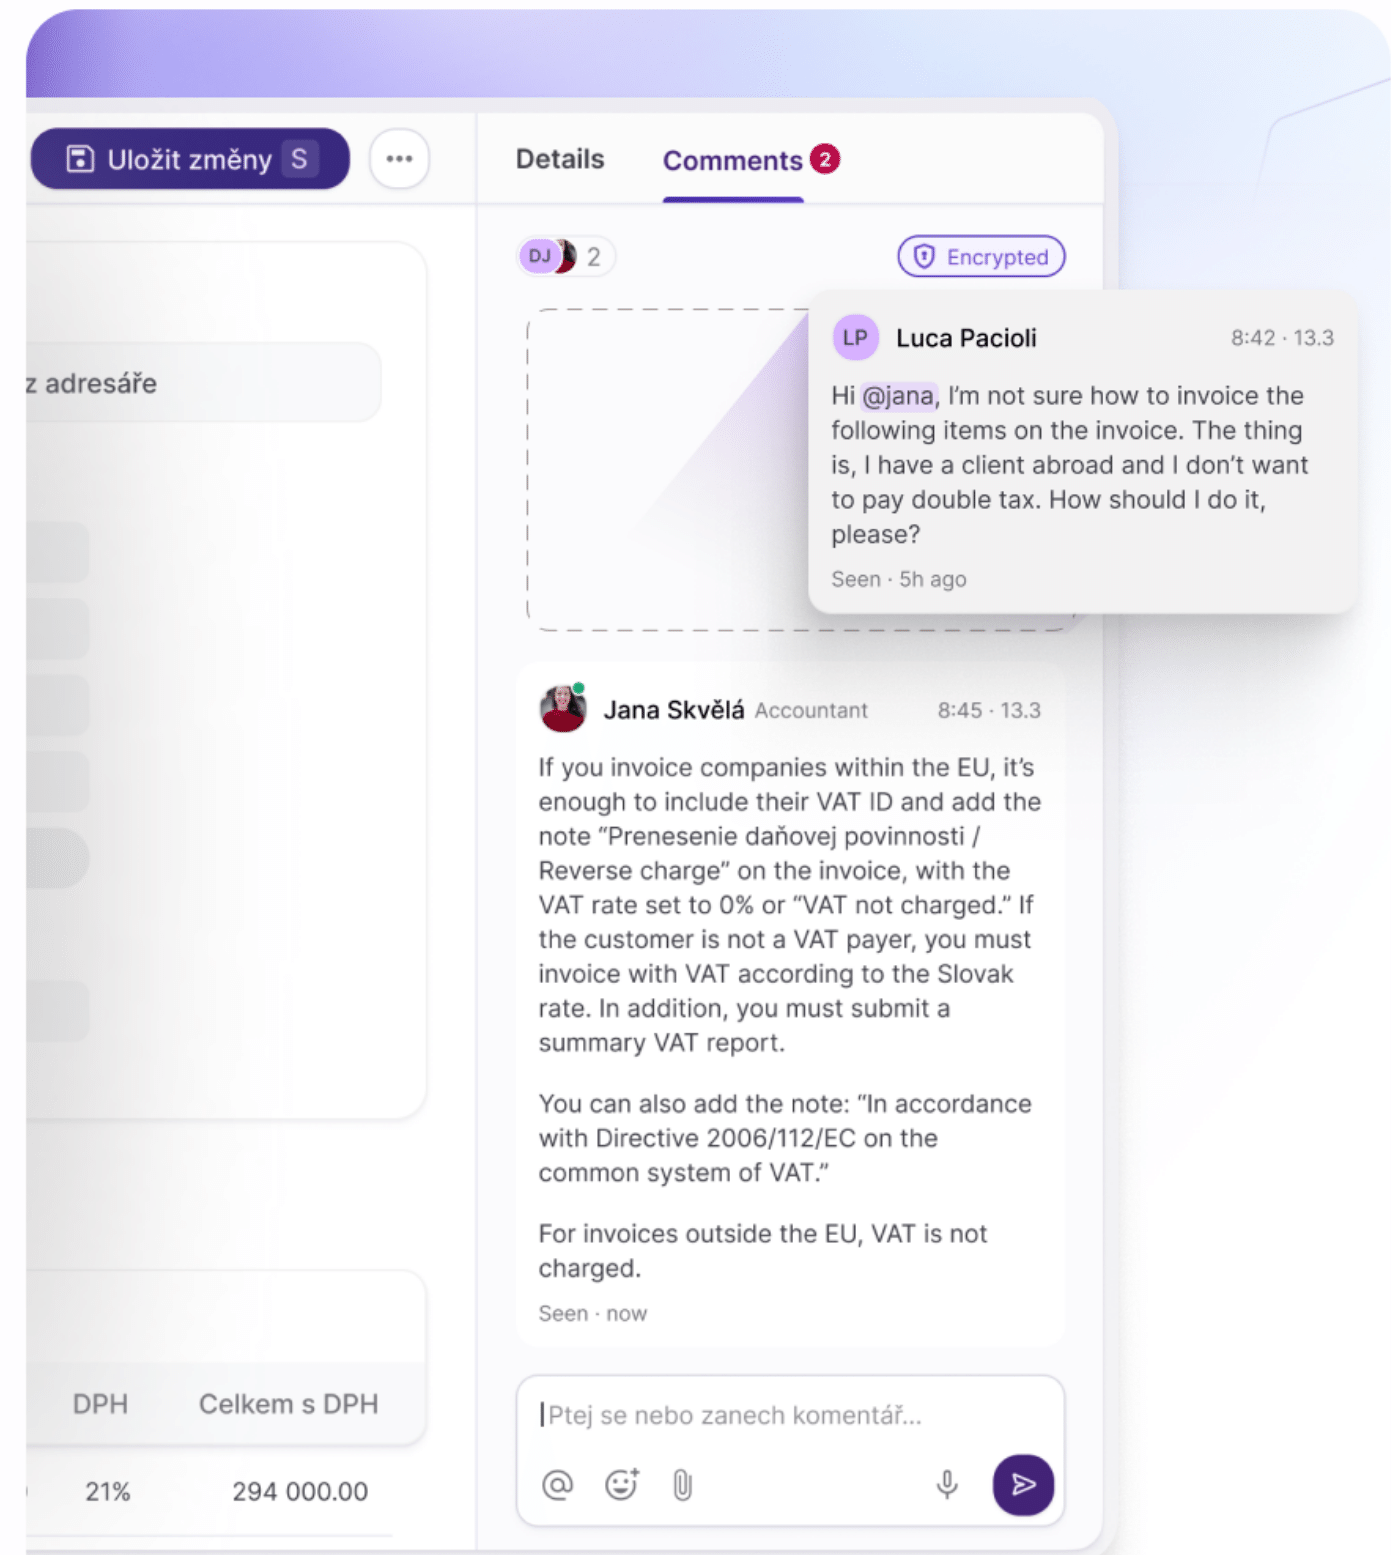

Tag your accountant
or teammate directly
in a document.

Chat via encrypted
communication.

Review and approve
payments together.
